**PRIME CONTRACT AWARDS  
BY SERVICE CATEGORY  
AND FEDERAL SUPPLY CLASSIFICATION**

Fiscal Years 1979, 1980, 1981, and 1982

Issued Annually by

**Department of Defense  
Washington Headquarters Services  
Directorate for Information  
Operations and Reports**

## **FOREWORD**

This report is published annually by the Office of the Secretary of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports. It presents data on Department of Defense (DOD) prime contract awards over \$10,000 by service category and Federal Supply Classification code for fiscal years 1979 through 1982. Data include statistics on both military functions of the DOD and civil functions of the Army Corps of Engineers.

Requests for additional information should be addressed to the WHS/DIOR Special Projects Division, Room 1C535, The Pentagon, Washington, D.C., 20301.

The contents of this publication may be reprinted without permission.

## INTRODUCTION

This report presents summary data on Department of Defense (DOD) prime contract awards over \$10,000 by Service Category and Federal Supply Classification (FSC) for Fiscal Years (FY) 1979, 1980, 1981, and 1982. Since FY 1980, the report has included data for civil functions performed by the Army Corps of Engineers. Civil functions encompass planning, programming, designing, constructing, and operating Federal water resource projects for navigation, flood control, hydroelectric power production, water supply, recreation, and other related activities.

Data are presented in three tables:

**Table A** — This table covers awards for research, development, test, and evaluation work (RDT&E). Data are displayed according to standard DOD procurement program categories.

**Table B** — Data on awards for other services and construction are provided in Table B, arrayed according to Federal Procurement Data System codes and descriptions. This structure, which covers all non-RDT&E services, is composed of 19 groups and almost 300 individual classes. Some of the groups which are shown on Table B include Construction of Structures and Facilities, Operation of Government-Owned Facility, Lease or Rental of Equipment, and Utilities and Housekeeping Services. This system, now employed as a federal requirement, was originally developed for the purpose of reporting the procurement of services other than RDT&E.

**Table C** — Table C contains data on awards for supplies and equipment, presented according to the appropriate Federal Supply Classification (FSC) code and description. This structure is composed of 77 groups and approximately 636 individual classes. This system was developed primarily for supply management of items known to be in the supply system of the Federal government. Definitions of the classes appear in the *Cataloging Handbook, Federal Supply Classification, Part I, "Groups and Classes," H2-1*, which may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

While there are many similarities between the FSC codes used in this publication and the Standard Industrial Product Codes (SIC) used by the Census Bureau of the Department of Commerce, the exact points of agreement and disagreement have not been ascertained. In many Census reports, SIC data are based on the primary product of an establishment rather than on the individual products it produces. In addition to code content differences, data from this report and certain Census Bureau reports do not agree as far as the time period covered or the point in time when data are reported. This report provides fiscal year data on contract awards (regardless of the date on which the product is to be delivered). Census Bureau reports contain calendar year figures measuring annual shipment or production, which may take place several years after contract award.

## **DATA CHARACTERISTICS**

The data presented in this report have the following characteristics:

1. Data cover only prime contracts (those awarded directly by the Department of Defense). The large number of subcontracts awarded for basic and intermediate materials and components are not reflected in this report. As an example, most of the steel plating for ships is purchased by defense prime contractors. Only a small portion is purchased directly by DOD (see code 9515). Similarly, a large dollar amount of electronic equipment is purchased by defense contractors who have received prime contracts for missiles and other weapon systems.
2. Detailed information on procurement actions of \$10,000 or less are not included in this report. However, in each of the Fiscal Years 1979 through 1982, from \$3 to more than \$8 billion was spent on these small transactions. This report's exclusion of these procurements therefore understates the purchase of commercial type items and services and may overemphasize military hard good items, which are normally purchased in large dollar amounts. Due to this exclusion, as an example, subsistence purchases (FSC Group 89) may be extremely understated. However, information about the makeup of these small purchases does not permit the identification of all categories and commodities and services which are similarly understated.
3. For security reasons, some contracts have been reported with a classification other than the one describing the item purchased. Therefore, data for a number of the Federal Supply Classes presented may be incomplete.
4. Data categorizing contract awards by Service Category and Federal Supply Classification include awards to all types of contractors. In this respect, the coverage differs from other reports published by WHS/DIOR which provide this type of information only on awards to business firms in the United States.
5. Figures in this report are shown in millions and may not add up due to rounding.

## **HIGHLIGHTS OF FY 1981 DATA**

Prime contract awards in FY 1982 totaled \$124,725 million. This is \$19,502 million, or 18.5 percent, more than in FY 1981. As shown or tabulated from this data in Table 1 (page 5), Intragovernmental/Foreign Military Sales (FMS) awards increased by \$2,957 million or 30.2 percent; awards for work outside the United States increased by \$963 million or 14.7 percent; and awards to educational and nonprofit institutions increased by \$313 million or 18.7 percent. Awards to business firms showed the largest dollar increase, \$15,268 million or 17.5 percent. When considering the overall percentage distribution of awards, changes were seen in only two categories — awards to business firms for work in the United States decreased by 1 percent and intragovernmental/FMS awards increased by 1 percent.

Table 2 (page 5) shows that actions over \$10,000 in FY 1982 totaled \$116,680 million. This is an increase of \$19,271 million or 19.8 percent over FY 1981.

Table 3 (page 6) provides data by the type of effort for awards over \$10,000. It shows that awards for RDT&E work increased by \$4,399 million or 42.0 percent; awards for other services and construction increased by \$6,109 million or 28.7 percent; and supply and equipment awards increased by \$8,762 million or 13.7 percent.

### **Awards for Research, Development, Test, and Evaluation (RDT&E)**

Within the RDT&E category, (See Table A, page 11) research decreased by \$9 million or 1.3 percent, exploratory development increased by \$204 million or 18.9 percent, and other development increased by \$4,303 million or 52.3 percent, while management and support decreased by \$98 million or 20.8 percent. The percentage distribution among these types of RDT&E work decreased by 2 percentage points for research; decreased by 1 percentage point for exploratory development; increased by 5 percentage points for other development; and decreased by 2 percentage points for management and support. In FY 1982 RDT&E was distributed as follows: research accounted for 5 percent; exploratory development accounted for 9 percent; other development accounted for 84 percent; and management and support accounted for 3 percent. Table 4 (page 6) shows FY 1981 and 1982 comparisons by selected subcategories within the DOD claimant programs.

A comparison of the RDT&E claimant programs for FY's 1981 and 1982 shows that the largest increases in dollar volume were for aircraft, \$2,167 million; missiles, \$1,045 million; and electronic and communications equipment, \$952 million. The only program which showed a significant decrease in dollar volume was ammunition, which declined by \$15 million or 5.1 percent.

### **Other Service and Construction Categories (With Changes of \$100 Million or More)**

As shown in Table 5 (page 7), the service category which had the most significant dollar increase of \$100 million or more in FY 1982 was Professional, Technical, and Management Services; the increase in this category was \$1,522 million or 46.6 percent.

### **Federal Supply Classification (FSC) Groups (With Changes of \$100 Million or More)**

A comparison of the FSC groups with changes of \$100 million or more (see Table 6, page 7) shows that, from FY 1981 to FY 1982, group 15 (Aircraft and Airframe Structural Components) had the most significant dollar increase; (\$1,594 million or 17.0 percent). Group 91 (Fuels, Lubricant, Oils and Waxes), which had the largest increase in FY 1981 over FY 1980, this year decreased by \$2,361 million or 18.2 percent. The only other decrease was in Group 34 (Metalworking Machinery) which dropped by \$209 million or 76.9 percent.
